THE FUTURE OF DISTRIBUTION

AGGREGATE SCREENS

Our non-blinding screens are high quality screening surfaces that help to minimize pegging and blinding while still separating flakes and splinters. These screens provide accurate screening and sizing where other products fail, due to high percentages of open area when compared to square openings, resulting in higher throughput. The wires in these screens vibrate independantly, which keeps the screens clean.

All non-binding screens are available in oil-tempered and stainless steel wire, and can be hooked with any edge style to fit all screening equipment.

NO MATTER WHICH OEM, WE'VE GOT YOU COVERED
